ENTERVIEW II®

Cordless Examination Headlight

The ENTERVIEW II® is a compact, cordless headlight which overcomes the need for connection to a fibre optic light source, separate battery pack or transformer, and hence increases freedom and mobility.

The balanced design of the ENTERVIEW II® headlight permits comfortable use during longer periods of time.

The light emitting diode (LED) provides enough light for a regular outpatient session.

The ENTERVIEW II® is a versatile aid that is suitable for use in ENT, plastic surgery, gynaecology, maxillo facial surgery etc.
